

Notes From The Field *SE*

Migration Report 11/2/18

UPDATE:

Was this helpful? Let us know by taking this [3 question survey](#).

Green Lake/Marquette

We are beginning to build bird numbers in our area. Mallards and Pintail have been making up the majority of the bird numbers in our area as of late. Most recently we have been experiencing mild sunny weather. In the next week we expect to experience rainy cloudy weather. Hunter pressure in our area is lower compared to our last report. Water levels in our area are back to lower compared to our last report and ice coverage in the area is currently at 0%.

Sheboygan/Eastern Fond du Lac

We are beginning to build bird numbers in our area. Mallards, Ring-necked ducks, and Scaup have been making up the majority of the bird numbers in our area as of late. Most recently we have been experiencing mild and sunny weather. In the next week we expect to experience mild cloudy weather. Hunter pressure in our area is lower when compared to our last report. Water levels in our area are back to normal compared to our last report and ice coverage in the area is currently at 0%. Sheboygan Marsh access is good again, cattails have been removed from the boat landing/dam area. But be aware of conditions changing quickly due to wind moving cattails mats around. North ditch is plugged however, with no ability to remove cattails due to dropping water levels.

Jefferson

We have yet to start building bird numbers in our area. Mallards and Wood ducks have been making up the majority of the bird numbers in our area as of late. Most recently we have been experiencing mild weather. In the next week we expect to experience mild cloudy weather. Hunter pressure in our area is

similar compared to our last report. Water levels in our area are back to normal compared to our last report our last report and ice coverage in the area is currently at 0%. A lot of local ducks have left and we're in the waiting period for northern ducks to make their arrival.

Waukesha/Walworth

We are beginning to build bird numbers in our area. Mallards, Wood ducks, and Ring-necked ducks have been making up the majority of the bird numbers in our area as of late. Most recently we have been experiencing cloudy and rainy weather. In the next week we expect to experience mild rainy weather. Hunter pressure in our area is similar compared to our last report. Water levels in our area are back to normal compared to our last report our last report and ice coverage in the area is currently at 0%.

Statewide

Overall, we are beginning to build bird numbers in Wisconsin. Mallards, Ring-necked ducks, and teal Other divers (Scaup, Bufflehead, Goldeneyes, etc.) are showing to be the most abundant bird throughout the state. Reports from across the state have shown that divers are still growing in numbers as they stage on Wisconsin waters.

Again, brood counts seemed average for mallards, blue-winged teal, wood ducks and other ducks. Canada goose numbers however seem to have been affected statewide due to the late snowfall we received in April that may affected our nesting geese. Late snowstorms in April set nesting back and caused a lot of first attempt failures across the state. Water levels across the state are variable with many places being higher than normal. Wisconsin has seen almost daily rainfall starting mid-August making water levels considerably higher than normal. Wetland food across the state seems to be similar to previous years and due to the amount of rain we have received lately crop harvest may start tracking behind what it should be compared to a normal year.

Thus far this season we have had variable reports from hunter on how the season is going so far for harvest. We cannot emphasize or encourage all of you enough to spend some time and scout before your hunting trips. Waterfowl hunters in Wisconsin have shown that hunters who scout 3 times before hunting shoot three times as many birds. It will be important also to check your spots out before hunting as some spots may not be huntable due to high water.

Be safe and happy hunting!

5 Important things to know:

1. North duck zone will open one week later than in previous years, resulting in a single statewide opener for the North, South and Mississippi zones on Sept. 29;
2. Elimination of the Horicon Canada goose Management Zone (resulting in a single statewide regular goose zone);
3. Increase in the daily Canada goose bag limit to three birds per day and there is a second split in the Southern Canada goose zone resulting in a goose season that is open during the Christmas and New Year's holidays; and
4. Canada goose hunters, registration of Canada geese and in-field validation of the Canada goose hunting permit is no longer required.
5. Check out [The Basics of Waterfowl Hunting in Wisconsin](#) document on the [Waterfowl Hunting](#) webpage along with other useful tools in our Hunter resources tab for a few tips and tricks!
